DETAILED ACTION

1. The following Application has been reviewed. Original claims 1-4 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by O'Leary et al. (hereinafter O'Leary) U.S. Patent 6,704,714.

Regarding claims 1 and 3, O'Leary discloses an electronic transaction system for the internet, to be used in an internet system comprising; at least one internet user site equipped with an internet accessible computer (column 15, lines 20-32); at least one provider website to provide products, services and/or information in said internet system (column 15, lines 33-52); at least one bank website to allow access by internet users, including said internet user site, to request payments (column 8, line 60 thru column 9, line 15); and a payment authentication server to examine requests and information and to generate results of examination (column 9, lines 46-64);

Art Unit: 3624

characterized in that said electronic transaction system operates a request of transaction in a method comprising the following steps: upon said provider website's receipt of a request of transaction by said internet user, linking said user site to said payment authentication server (column 16, lines 5-23); said payment authentication server asking said user site to input necessary information for examination (column 16, lines 5-23); said payment authentication server examining said input information according to enrolled information of said user site (column 16, line 52 thru column 17, line 33); upon approval of examination by said payment authentication server, linking said payment authentication server to said bank website, otherwise, linking to said provider website and transmitting to said provider website results of said examination.(column 16, line 52 thru column 17, line 33); after having linked to said bank website, said payment authentication server requesting said bank website to authorize payments to said provider site by transmitting said input information to said bank website (column 16, line 52 thru column 17, line 33); said bank website examining said request by comparing said input information with enrolled information of said user site and generating a result of said examination (column 16, line 52 thru column 17, line 33); said bank website transmitting said results of examination to said payment authentication server (column 17, lines 34-51); and said payment authentication server linking to said provider website and transmitting said result of examination to said provider website (column 17, lines 34-51).

Claims 2 and 4, wherein said electronic transaction system for the internet further links to said user site and transmits said result of examination to said user site after said result of examination is transmitted to said provider website (column 16, lines 23-42).

Art Unit: 3624
